**A TEAM PRODUCTION THEORY  
OF CANADIAN CORPORATE LAW**

**Abstract:** This article suggests that the response to the most recent Supreme Court of Canada decision concerning corporate governance, Peoples, and the Canadian corporate governance debate, as currently engaged, are operating on the false underlying assumption that the principle-agent, shareholder primacy model accurately describes Canadian corporate law's treatment of public corporations. The article applies the Team Production theory developed by American corporate law scholars, Margaret Blair and Lynn Stout, to argue that the Canadian corporate legal understanding of public corporations that are not controlled by a single shareholder or group of shareholders reflects a director primacy norm rather than a shareholder primacy norm.

Canadian corporate law provides that directors of such public corporations with widely-held share ownership and voting rights are free from direct control of any corporate stakeholders. Rent allocation among Canadian corporate stakeholders depends on extra-legal advantages. A potential departing point for Canadian corporate law, the oppression remedy, continues to develop to deal with such extra-legal advantages rooted primarily in unequal power relations among corporate stakeholders.

However, in its current application and predicted future application, the oppression remedy does not provide any given stakeholder group with an ability to dominate the boards of public corporations and obviate the director primacy norm.

The article suggests that because the director primacy norm accurately describes Canadian corporate law, further consideration needs to be given to corporate law's relative relevance in dictating how Canadian corporations currently operate. For example, do directors of Canadian corporations really think of themselves as mediating hierarchs and corporations as teams? More importantly, can directors of Canadian corporations play a mediating hierarchy role given the current

composition of corporate boards? The responses to these questions will help inform further inquiry into whether the director primacy norm is the ideal norm for Canadian corporate law.

# A TEAM PRODUCTION THEORY OF CANADIAN CORPORATE LAW

Stephanie Ben-Ishai\*

## PART I: INTRODUCTION

The most recent Supreme Court of Canada decision concerning corporate governance, *Peoples Department Stores Inc. (Trustee of) v. Wise*,<sup>1</sup> has been both criticized and applauded on the basis that it represents a significant departure from the traditional understanding of the legal role of directors of Canadian public companies.<sup>2</sup> *Peoples* centered around Wise Stores and the Wise brothers. Wise Stores was founded in 1930 by Alex Wise, who opened a small retail-clothing store in Montreal, Quebec. Alex Wise had three sons, who each joined his business when they came of age. In 1986, Wise Stores, by now a chain of department stores, went public and was listed on the Montreal Stock Exchange. In 1992 Wise Stores acquired the troubled Peoples chain from M&S, which was owned by the British parent

<sup>2</sup> For an example of the criticism, refer to Allan Hutchinson, "A Not-So-Wise Decision" [forthcoming in 2005, manuscript on hand with author]. For an example of the applause, refer to Bob Milnes, "Case Comment" (2005) 20.3 B.F.L.R. 148. For a more general evaluation of the decision see: Catherine Francis, "*Peoples Department Stores Inc. v. Wise*: The Expanded Scope of Directors' and Officers' Fiduciary Duties and Duties of Care" (2005), 41 C.B.L.J. 175; Wayne D. Gray, "A Solicitor's Perspective on *Peoples v. Wise*" (2005), 41 C.B.L.J. 184; Warren Grover, "The Tangled Web of the *Wise* Case Warren Grover" (2005), 41 C.B.L.J. 200; Ian B. Lee, "*Peoples Department Stores v. Wise* and the 'Best Interests of the Corporation'" (2005), 41 C.B.L.J. 212; Stéphane Rousseau, "Director's Duty of Care after *Peoples*: Would It Be Wise to Start Worrying about Liability?" (2005), 41 C.B.L.J. 223; and Jacob Ziegel, "The *Peoples* Judgment and the Supreme Court's Role in Private Law Cases" (2005), 41 C.B.L.J. 236.

company, Marks and Spencer. Peoples became a wholly-owned subsidiary of Wise Stores. The three Wise brothers were the sole directors of Peoples. The Toronto Dominion Bank ("TD") and M&S financed the purchase and took security interests in the assets of Peoples.

In an effort to rationalize operations, the Wise brothers began consolidating the overlapping corporate functions of Wise Stores and Peoples. Numerous problems surfaced and ultimately the brothers decided upon an inventory procurement policy such that Peoples would make all purchases from North American suppliers and Wise Stores would, in turn, make all purchases from overseas suppliers. The difficulty with this arrangement was that approximately 82 per cent of the total inventory of Wise Stores and Peoples was purchased from North American suppliers, which inevitably meant that Peoples would be extending significant trade credit to Wise Stores.

Despite efforts to rationalize operations, the fragile financial position of Peoples and Wise Stores continued. Following the presentation of financial statements showing poor results for Peoples' third fiscal quarter, M&S initiated bankruptcy proceedings against both Wise Stores and Peoples. In response, a notice of an intention to make a proposal under the *Bankruptcy and Insolvency Act*<sup>3</sup> was filed on behalf of Peoples the same day. However, the following month Peoples consented to the bankruptcy petition filed by M&S and both Wise Stores and Peoples were declared bankrupt on January 13, 1995.

Peoples' unsecured suppliers, whose claims were largely purchased by vulture funds,<sup>4</sup> represented the majority of the creditors whose

<sup>4</sup> Milnes, *supra* note 2. Vulture funds are asset-based funds, which invest in distressed debt or other securities issued by companies in default or in bankruptcy. Vulture funds are relatively new players on the Canadian bankruptcy and reorganization landscape. See Justin R. Fogarty, "Vulture

claims were not paid in full in the Peoples bankruptcy. The entire balance of the purchase price owed to M&S, the full outstanding debt owed to TD and almost all of the landlords' lease claims were satisfied from the assets of Wise Stores and Peoples. The vulture funds that purchased the unsecured suppliers' claims argued that the Wise brothers as directors of Peoples breached their statutory fiduciary duty and duty of care in adopting the inventory procurement policy to the detriment of the unsecured suppliers. The Supreme Court upheld the Quebec Court of Appeal's finding that the Wise brothers had not breached their fiduciary duty or duty of care in adopting the inventory procurement policy. In reaching this decision, the Supreme Court held that "the interests of the corporation are not to be confused with the interests of the creditors or any other stakeholders."<sup>5</sup>

Widespread current thinking among the Canadian legal community supports the view that *Peoples* is an unjustified departure from Canadian corporate law's principal-agent, shareholder primacy understanding of the board of directors' role in public corporations. It is on the basis of this shareholder-primacy understanding of the existing legal role of directors of public corporations that over the last decade Canadian academics, lawyers, and the judiciary have put forward diverging normative visions of what the legal role of directors *should be*. At one end of the spectrum is the most common account provided by law and economics scholars and others who adopt a principal-agent model of the relationship between shareholders and the board, where directors' sole duty is to maximize the wealth of the shareholders, who are the owners of the corporation.<sup>6</sup> According to this account, other corporate stakeholders should be left to protect their own

interests by bargaining for the best returns that they can. At the other end of the spectrum, less popular rival progressive accounts suggest that directors should owe duties to all of the corporation's stakeholders.<sup>7</sup> These accounts have generally accepted that the principle-agent, shareholder primacy model is currently operating in Canadian corporate law, but call for legal reforms so that corporations can be made to run with due regard for corporate stakeholders such as employees, creditors, customers, suppliers, and local communities.<sup>8</sup> While widely rejected in academic and legal circles, such rival accounts have, however, found support in Canadian popular culture, as is evidenced by the success of Joel Bakan's book<sup>9</sup> and the documentary *The Corporation*.<sup>10</sup>

This article suggests that the response to *Peoples* and the Canadian corporate governance debate, as currently engaged, is operating on the false underlying assumption that the principle-agent, shareholder primacy model accurately describes Canadian corporate law's treatment of public corporations.<sup>11</sup> This article applies the Team Production Theory developed by American corporate law scholars, Margaret Blair and Lynn Stout,<sup>12</sup> to argue

(containing 8 different articles on Team Production Theory); Erica A. Chiappinelli, "The Moral Basis of State Corporate Law Disclosure" (2000) 49 Cath. U.L. Rev. 697; and Mae Kuykendall, "Assessment and Evolution: Retheorizing the Evolving Rules of Director Liability" (1999) 8 J.L. & Pol. 1. Given the significant scholarly attention Team Production Theory has received in the United States, it is surprising that it has not attracted greater attention in Canada. One notable exception is the debate between Robert Yalden and Jeffrey MacIntosh in the 2002 Queen's Business Law Symposium. This symposium did, however, pre-date *Peoples* and the authors were more concerned with questions of "what should be" than questions of "what is" and their focus was on questions surrounding the interplay between corporate and securities law in Canada. See Robert Yalden, "Competing Theories of the Firm and Their Role in Canadian Business Law" in *The Corporation in the 21<sup>st</sup> Century: Ninth Queen's Annual Business Law Symposium* (Toronto: Carswell, 2003) & Jeffrey MacIntosh, "The End of Corporate Existence: Should Boards Act as Mediating Hierarchs? A Comment on Yalden" in *The Corporation in the 21<sup>st</sup> Century: Ninth Queen's Annual Business Law Symposium* (Toronto: Carswell, 2003).

<sup>13</sup> This is in contrast to corporations controlled by a single shareholder or group of shareholders, where a small number of investors select and exercise tight control over the board and at the same time are often involved in managing the corporation as officers or directors. The corporate law applicable to this type of corporation may more appropriately be explained by a principle-agent, shareholder primacy model, than a mediating hierarch model. It is notable that a majority of Canadian public corporations have been described as under legal or *de facto* control of a single or small group of shareholders. Recent Canadian scholarship has focused on this type of corporation. See for example, Ronald J. Daniels & Paul Halpern, "Too Close for Comfort, The Role of Closely Held Public Corporations in the Canadian Economy and the Implications of Public Policy" (1996) 26 Can. Bus. L.J. 11; Randal K. Morck, "On the Economics of Concentrated Ownership" (1996) 26 Can. Bus. L.J. 63 at 69; Stephanie Ben-Ishai, "Family Capitalism and Minority Shareholder Recourse in Canada" in Thémis, eds. *Governance of Public Institutions, Professions, Corporations, Tribunals and Courts: Ethics, Responsibility and Independence* (Montreal: Les Éditions Thémis, 2005) [forthcoming in 2005, manuscript on hand with the author]; and

corporate stakeholders depends on extra-legal advantages. A potential departing point for Canadian corporate law, the oppression remedy, continues to develop to deal with such extra-legal advantages rooted primarily in unequal power relations among corporate stakeholders. However, in its current application and predicted future application, the oppression remedy does not provide any given stakeholder group with an ability to dominate the boards of public corporations and obviate the director primacy norm.

Part II briefly describes Team Production Theory. Part III reviews Canadian corporate law as it applies to public corporations to assess its consistency with the three concepts that have been identified as central to Team Production Theory:

1. Corporate personality and the derivative action;
2. The statutory fiduciary duty and duty of care; and
3. The limits on shareholder voting.

Concluding in Part III that the director primacy norm is at work in the parts of Canadian corporate law that are most comparable to American corporate law, Part IV argues that the judicial treatment of the oppression remedy is also consistent with a Team Production Theory of Canadian corporate law. Part V concludes by suggesting that because the director primacy norm accurately describes Canadian corporate law, further consideration needs to be given to corporate law's relative relevance in dictating how Canadian corporations currently operate. For example, do directors of Canadian corporations really think of themselves as

---

Stephanie Ben-Ishai and Poonam Puri, "Dual Class Share Ownership in Canadian Family-Run Corporations: Evidence of Corporate and Securities Law Failures" (2004) [unpublished, manuscript on hand with the author]. However, it still remains important to consider what Canadian corporate law has to say about public corporations that do not fit this model. These are the public corporations that are referred to in this article.

“mediating hierarchs” and corporations as teams? More importantly, can directors of Canadian corporations play a mediating hierarchy role given the current composition of corporate boards? The responses to these questions will help inform further inquiry into whether the director primacy norm is the ideal norm for Canadian corporate law.

## PART II: TEAM PRODUCTION THEORY

Since Berle and Means suggested that the hallmark of the public corporation is the separation of ownership and control,<sup>14</sup> numerous other institutional arrangements have developed to perform a similar function. These include income trusts<sup>15</sup> and partnerships.<sup>16</sup> Accordingly, it is the board-based governance structure provided for in American (and Canadian) corporate law that differentiates public corporations from other business forms.<sup>17</sup> On this basis, Blair and Stout have developed a descriptive and normative theory that challenges the dominant account that public corporations

---

<sup>14</sup> Adolf A. Berle, Jr. & Gardiner C. Means, *The Modern Corporation and Private Property* (New York: MacMillan, 1932).

<sup>15</sup> For more on governance of income trusts see Michael J. Johnson, “Survival of the Fittest: The Corporate Governance of Income Trusts” in *Corporate Governance and Securities Regulation in the 21<sup>st</sup> Century* (Markham: Butterworths, 2004).

<sup>16</sup> See for example, the Ontario *Limited Partnerships Act*, R.S.O. 1990, c. L.16, s. 13. Section 13 states that, (1) A limited partner is not liable as a general partner unless, in addition to exercising rights and powers as a limited partner, the limited partner takes part in the control of the business. (2) For the purposes of subsection (1), a limited partner shall not be presumed to be taking part in the control of the business by reason only that the limited partner exercises rights and powers in addition to the rights and powers conferred upon the limited partner by this Act. For more on limited liability partnerships, see J. Anthony VanDuzer, *The Law of Partnerships and Corporations*, 2d ed. (Toronto: Irwin Law, 2003) c. 2.

<sup>17</sup> Franklin A. Gevurtz, “The European Origins and the Spread of the Corporate Board of Directors” (2004) 33 *Stetson L. Rev.* 925. Gevurtz demonstrates that around the world the key similarity among corporate governance regimes is that corporations are managed by, or under the direction of a board of directors.

belong to shareholders and that directors are shareholders' agents. Unlike others who have critiqued the shareholder primacy, principal-agent understanding of corporate law, Blair and Stout conceive of public corporations as a nexus of contracts.<sup>18</sup> That is, like those who support the shareholder primacy norm, they argue that corporations consist of bargains made between various corporate stakeholders, even though not all such bargains are necessarily spelled out in complete contracts.

Blair and Stout's theory, referred to as a Team Production Theory, suggests that directors of public corporations, as prescribed by American corporate law, are "mediating hierarchs," who are accountable to no particular corporate stakeholder.<sup>19</sup> The current state of the law of public corporations with respect to these mediating hierarchs in the United States is supported by the team production concept from economic literature.<sup>20</sup> Public corporations are comprised of team members, such as shareholders, creditors, workers, managers, and communities that

---

<sup>18</sup> TPT, *supra* note 12 at 287. For a discussion of other conceptions of corporations, for instance as an economic institution for social service, see E.M. Dodd, "For Whom Are Corporate Managers Trustees?" (1932) 45 Harv. L. Rev. 1145 at 1148. ; see also, Ruth O. Kuras, "Corporate Social Responsibility: A Canada – U.S. Comparative Analysis" (2002) 28 Man. L.J. 303 at 304-05.

<sup>19</sup> TPT, *ibid.* at 282.

<sup>20</sup> TPT, *ibid.* at 272. Team production refers to the division of labor used when complex forms of production cannot be accomplished efficiently (or at all) by individuals or families. Firms coordinate team production to (a) reduce transaction costs, and (b) exploit economies of scale or scope. This theory can be traced in large part to Ronald Coase. See R.H. Coase, *The Firm the Market and the Law* (Chicago: University of Chicago Press, 1990). Also see for example, Armen A. Alchian & Harold Demsetz, "Production, Information Costs, and Economic Organization, (1972) 62 Am. Econ. Rev. 777 and Michael C. Jensen & William H. Meckling, "Theory of the Firm: Managerial Behavior, Agency Costs and Ownership Structure," (1976) 3 J. Fin. Econ. 305. A complete discussion of the economic literature that the TPT depends on is beyond the scope of this article. The key insight is that the economic justification for the corporation is that a corporation will form when it is more efficient for people to work together within a corporation as compared with simply relying upon individually negotiated contracts.

form a team (the corporation) because the members recognize that each will obtain more from a collective enterprise than on their own.<sup>21</sup> On this basis, all of the team members make investments that are specific to the team. Team members expect to share in the corporation's production rents and surpluses, but are unable to contract completely for that result, due to reasons of cost, incentives, and uncertainty as to the separate value of their contributions following team production.<sup>22</sup>

Blair and Stout review the various possibilities, other than the use of a mediating hierarchy, for allocation of rents and surpluses ex-ante and ex-post among team members and conclude that they produce sub-optimal outcomes.<sup>23</sup> For example, if an individual team member was to be trusted with making decisions on allocation of rents and surpluses ex-post, each decision they made would be treated as suspicious. Accordingly, adopting Rajan and Zingales' idea of vesting allocational authority in an independent third party, Blair and Stout suggest that the team delegates to the board of directors the ultimate authority over running the corporation and also the distribution among team members of production rents and surpluses.<sup>24</sup> The result is that the costs of obtaining team specific investments are lowered and employing this mediating hierarchy model of governance maximizes social wealth. Because of the existence of a mediating hierarchy, public corporations can make credible commitments that they will refrain from opportunistic behaviour directed at members of the team. Blair and Stout recognize that this is only a second-best solution to the team production problem, because the independent board has no direct stake in the success of the corporation. However, the mediating hierarchy solution is superior to alternative rent and surplus allocation mechanisms they canvas.

---

<sup>21</sup> TPT, *ibid.* at 277.

<sup>22</sup> *Ibid.*

<sup>23</sup> TPT, *ibid.* at 269-71.

<sup>24</sup> TPT, *ibid.* at 272- 76.

Blair and Stout claim that the current state of American corporate law reflects Team Production Theory's understanding of the role of the board. The procedural hurdles and substantive limitations on the use of the derivative action to enforce directors' duties as well as the limited ability of shareholding voting rights to impact on director preferences give directors broad discretion to manage the corporation without pure devotion to any particular team member's interests.<sup>25</sup> In reviewing Blair and Stout's description of American corporate law, David Millon has suggested that a more accurate statement is that,

though corporate law pays lip service to shareholder primacy, it is actually ineffective when it comes to rendering management accountable to shareholders ... this doctrinal inefficacy ... reflects a commitment to director discretion, which in this roundabout manner constitutes the board as independent ... mediators.<sup>26</sup>

This reflection is equally applicable in the Canadian context.

---

<sup>25</sup> TPT, *ibid.* at 287-315.

<sup>26</sup> David Millon, "New Game Plan or Business as Usual? A Critique of the Team Production Model of Corporate Law" (2000) 86 Va. L. Rev. 1001 at 1010. In addition to Millon a number of other commentators have critiqued the Team Production Model of corporate law. Like Millon, other commentators have focused primarily on the Blair and Stout's position that the Team Production Model of corporate law *is* the ideal model for all team members. In particular, the tenuous position of employees is often pointed to. See for example: Kent Greenfield, "The Place of Workers in Corporate Law" (1998) 39 B.C. L. Rev. 283; Lawrence Mitchell, "Structural Holes, CEOs, and Informational Monopolies: The Missing Link In Corporate Governance" (2005) 70 Brooklyn L. Rev. 1313; and Kelly Testy, "What is the "New" Social Responsibility?: Linking Progressive Corporate Law with Progressive Social Movements" (2002) 76 Tul. L. Rev. 1227. Also see *infra*, note 78 for an example of the other forms of critique that the Team Production Model of corporate law has been subject to. For example, Blair and Stout have been criticized for focusing on shareholder voting rights because they overlook the market for corporate control.

### PART III: TEAM PRODUCTION THEORY AND CANADIAN CORPORATE LAW

The federal *Canadian Business Corporations Act*<sup>27</sup> provides an example of the type of legal rules that public corporations must adhere to in Canada.<sup>28</sup> This Part reviews the extent to which the judicial application of three central features of Canadian corporate law found in the CBCA fit with the role ascribed to directors by Team Production Theory and depart from the shareholder primacy, principal-agent understanding of Canadian corporate law that retains its hegemony in Canadian corporate governance debates.

Inherent to the concept of agency is that the principal enjoys control or power over the actions of the agent.<sup>29</sup> The role of directors as set out in Canadian corporate law departs from this understanding. The primary legal role of directors is to “manage, or supervise the management of, the business and the affairs of the corporation.”<sup>30</sup> Canadian corporate law does not grant shareholders any power to initiate action or to control the board. A review of the derivative action, the statutory duties of boards, and shareholder voting, reveal that directors are not constituted as shareholders’ agents by Canadian corporate law. Rather, these three central aspects of Canadian corporate law allow boards to pursue the mediating hierarch model envisioned by Team Production Theory.

---

<sup>27</sup> R.S.C. 1985, c.C-44 [CBCA].

<sup>28</sup> For a review of the differences in the provincial corporate statutes, see Ronald J. Daniels, “Should Provinces Compete? The Case for a Competitive Corporate Market” (1991) 30 McGill L.J. 130.

<sup>29</sup> VanDuzer, *supra* note 16, c. 5.

<sup>30</sup> CBCA, *supra* note 27, s. 102(1).

## CORPORATE PERSONALITY AND THE DERIVATIVE ACTION

The corporation's status as a legal person, separate from its shareholders, has been described as a striking aspect of corporate law supporting the mediating hierarch model.<sup>31</sup> Derived from the legal fiction of corporate personality is the concept in Canadian corporate law that can be traced back to *Foss v. Harbottle*,<sup>32</sup> that only a corporation can sue for injuries to the corporation, regardless of any injury to corporate stakeholders. Following *Foss v. Harbottle*, corporate stakeholders, including shareholders, could not sue for an injury to the corporation at common law.<sup>33</sup> *Foss v. Harbottle* was based on the position that if a corporation is a separate legal person, separate from its members, and the corporation was wronged, the corporation itself should sue.<sup>34</sup> The rule in *Foss v. Harbottle* is particularly problematic with respect to fiduciary duties. Directors owe fiduciary duties to the corporation. According to the rule in *Foss v. Harbottle*, any action for breach of fiduciary duty must be brought by the corporation. However, in public corporations, the corporation acts through the board, causing a conflict where the board is asked to bring a claim in the corporation's name against themselves. It is this problem that is the source of the derivative action in Canadian corporate law, which permits certain corporate stakeholders under limited circumstances to step into the shoes of the corporate entity and sue in its name and on its behalf.

---

<sup>31</sup> TPT, *supra* note 12 at 290-315.

<sup>32</sup> (1893), 2 Hare 461; 67 E.R. (V.C.). For a comprehensive treatment of the history of the oppression remedy see: Jeffrey MacIntosh, "Minority Shareholder Rights in Canada and England: 1860-1987" (1989) 27 Osgoode Hall L.J. 561; and Deborah A. DeMott, "Oppressed but not Betrayed: A Comparative Assessment of Canadian Remedies for Minority Shareholders and other Corporate Constituents" (1993) 56 Law & Contemp. Probs. 192 [DeMott (1993)].

<sup>33</sup> DeMott (1993), *ibid.* at 192.

<sup>34</sup> Jason W. Neyers, "Canadian Corporate Law, Veil-Piercing, and the Private Law Model Corporation" (2000) 50 U.T.L.J. 173 at 187.

The CBCA provides that, in order for leave to be granted for a derivative action, the complainant must show that not less than fourteen days notice has been given to the directors of the corporation of the intention to apply to the court if the directors do not bring or defend the action, unless otherwise ordered by the court; the complainant is acting in good faith; and that it appears to be in the interests of the corporation or its subsidiaries that the action be brought, prosecuted, defended, or discontinued.<sup>35</sup> To bring a derivative action under the CBCA, the applicant must be a "complainant." A "complainant" includes: (a) a registered holder or beneficial owner, and a former registered holder or beneficial owner, of a security of a corporation or any of its affiliates; (b) a director or an officer or a former director or officer of a corporation or any of its affiliates; (c) the Director; or (d) any other person who, in the discretion of a court, is a proper person to make an application under this Part.<sup>36</sup>

For the most part, the procedural aspects of the derivative action found in Canadian corporate law mirror the American requirements. These procedural aspects of the derivative action have been used by Blair and Stout to support the claim that the director primacy norm exists in American corporate law on three grounds: (a) the procedural aspects of the derivative action limit its use; (b) if a derivative action is successful any damages go to the corporation; and (c) under certain circumstances, stakeholders other than shareholders are granted standing to sue derivatively. All three propositions are supported by Canadian corporate law.

A review of Canadian case law from November 1, 1999 to November 1, 2004, reveals that only three derivative actions were reported.<sup>37</sup> A shareholder initiated each of these actions, and only

---

<sup>35</sup> CBCA, *supra* note 27, s. 239(2).

<sup>36</sup> CBCA, *ibid.*, ss. 238, 241.

<sup>37</sup> A Quicklaw search for "derivative /2 action" and "duty" in the CJ database revealed 83 cases. Out of these cases only the highest court decision for each case was considered and only the main action was considered. The small

one was successful. None of the actions were in the context of a public corporation. This review of the case law confirms Blair and Stout's observation in the Canadian context that the derivative action has been utilized effectively in limited situations.

As Iacobucci and Davis have noted, in the Canadian context, the real danger is not a multiplicity of derivative actions, but a complete absence of suits.<sup>38</sup> Just as in the American context, this result can be explained in part in the Canadian context by the procedural requirement for bringing a derivative action. Blair and Stout's observation regarding the recipient of damages in a successful derivative action is also accurate in the Canadian context.<sup>39</sup> The fact that the corporation is the recipient of any

---

number of reported decisions may also be explained in part by the fact that cases are settled out of court. However, currently there is no published empirical evidence to suggest that there are a significant number of such cases. In *McAteer v. Devencroft Developments Ltd.*, [2001] A.J. No. 1481 (QL), although there were other actions, the derivative action on behalf of Devencroft was based on allegations that Billes and McAteer, as directors and officers of DDL, breached their contractual, legal and fiduciary duties to the corporation to act honestly, in good faith and in the best interests of Devencroft; failed to comply with the provisions of the unanimous shareholder agreement; and failed to manage the affairs of the corporation prudently and thereby protect its interests. The derivative action failed as Justice Rooke held that the decisions made by the directors of the corporation were properly considered. In *Discovery Enterprises Inc. v. Ebco Industries Ltd.*, [2002] B.C.J. No. 1957 (QL), Discovery Enterprises as a shareholder of Ebco Industries Ltd. initiated a derivative action based on misuse of corporate funds. The derivative action was dismissed. In *Jordan Inc. v. Jordan Engineering Inc.*, [2004] O.J. No. 3260 (QL), one of the shareholders and principals of Jordan Inc. brought a derivative action on the basis of wrongful appropriation by the other principal and shareholder through Jordan Engineering Inc., which was a breach of her fiduciary duty to the corporation. The action was successful as Justice Kruzick held that Murre took advantage of a business opportunity that was not in the best interest of Jordan Inc.

<sup>38</sup> Edward M. Iacobucci & Kevin E. Davis, "Reconciling Derivative Claims and the Oppression Remedy" (2000) 12 Sup. Ct. L. Rev. (2d) 87.

<sup>39</sup> William Kaplan & Bruce Elwood, "The Derivative Action: A Shareholder's 'Bleak House'?" (2003) 36 U.B.C. L. Rev. 443 at 455.

damages awarded ensures that any benefits from such an action have the potential to accrue to all of the corporation's stakeholders. Shareholders can only benefit directly when the board determines that a dividend should be made to shareholders. Another significant feature that supports the notion that the derivative action exists for the benefit of the entire corporation is that the CBCA expressly provides that evidence of shareholder approval, or the possibility of future shareholder approval, is not determinative of whether a derivative action may proceed.<sup>40</sup> The procedural hurdles to suing derivatively, the limited weight of shareholder approval, and the fact that damages are awarded to the corporation can be justified by the mediating hierarch model because these factors insulate directors from shareholder (and other corporate stakeholder) challenge and control.

While the derivative action has been utilized only by shareholders in Canada, and only in rare cases where they have been able to overcome the collective action and procedural hurdles, there is a broader scope for the range of complainants that can bring a derivative action.<sup>41</sup> Out of this range of complainants, however, only creditors have successfully sought standing to sue derivatively. In *Dylex Ltd. (Trustee of) v. Anderson*,<sup>42</sup> the Ontario Superior Court of Justice held that the trustee in bankruptcy as representative of creditors of Dylex was an appropriate complainant for a derivative action. Four months after the completion of an agreement between Dylex and the Hareof Wolf Group Inc., which provided for the latter to acquire all of the shares of Dylex, Dylex was put into bankruptcy. The trustee claimed that the agreement breached the directors' duty of care to Dylex creditors and fiduciary duty to Dylex.

The limited use of the derivative action is consistent with Team Production Theory, which seeks to limit rent seeking by corporate

---

<sup>40</sup> CBCA, *supra* note 27, s. 242(1).

<sup>41</sup> VanDuzer, *supra* note 16, c. 9.

<sup>42</sup> (2003), 63 O.R. (3d) 659 (Ont. Sup. Ct. of Justice) [*Dylex*].

stakeholders that wider availability of the action would provide. However, corporate stakeholders need to be granted the ability to sue directors derivatively in order for the existence of the derivative action to continue to have any role in ensuring that team members can trust the board. The explanation for why shareholders have been able to use the remedy, albeit on rare occasions, may be that in those instances they have been able to convince the court that they have interests that are in harmony with a number of other stakeholders. However, where the corporation approaches insolvency, this might not be the case. In such situations, shareholders may prefer high-risk approaches, with low downside risk to them, but at the expense of other corporate stakeholders, such as creditors and employees. Accordingly, the most appropriate method to ensure that boards continue to exercise their mediating hierarch role for the best interests of the corporation as a whole is to grant creditors standing to sue derivatively, in such instances. On this basis, *Dylex* is consistent with the pattern in Canadian corporate law that supports granting standing to sue derivatively only in limited circumstances to protect the interests of the corporation as an entity, not the interests of any particular group of corporate stakeholders.

## STATUTORY DUTIES

Moving from the procedure for bringing a derivative action to the substance of directors' duties, upon which corporate stakeholders may base a derivative action to sue in the corporation's name if breached, Blair and Stout claim that it becomes clear that such duties serve the corporation rather than any particular corporate stakeholder. In the Canadian context, the judicial application of both the statutory fiduciary duty and the statutory duty of care support Blair and Stout's claim. That is, both duties will subject directors to liability only in situations where the conduct harms the corporation as a whole, not just the corporation's shareholders.

## FIDUCIARY DUTY

The CBCA statutory duty referred to by Canadian commentators as the “fiduciary duty” and referred to by American commentators as the “duty of loyalty,” requires directors to “act honestly and in good faith with a view to the best interests of the corporation.”<sup>43</sup> Canadian commentators have described the Canadian fiduciary duty in broad terms:

The statutory fiduciary duty requires directors and officers to act honestly and in good faith *vis-à-vis* the corporation. They must respect the trust and confidence that have been reposed in them to manage the assets of the corporation in pursuit of the realization of the objects of the corporation. They must avoid conflicts of interest with the corporation. They must avoid abusing their position to gain personal benefit. They must maintain the confidentiality of information they acquire by virtue of their position. Directors and officers must serve the corporation selflessly, honestly and loyally.<sup>44</sup>

The application of this broad duty, however, has generally been restricted to a narrow range of situations where a director has made some profit or received some advantage at the expense of the corporation.<sup>45</sup> Such situations may arise where a director competes with the corporation, is involved in a transaction with the corporation in the director’s personal capacity, or where she takes advantage of opportunities personally that she had a duty to obtain for the corporation. Some early case law and at least one

---

<sup>44</sup> Kevin P. McGuinness, *The Law and Practice of Canadian Business Corporations* (Toronto: Butterworths, 1999) at 715, as cited by the Supreme Court of Canada in *Peoples* at para. 35.

<sup>45</sup> VanDuzer, *supra* note 16, c. 8.

commentator has suggested that the fiduciary duty should extend to situations where directors have made profits as a result of their position but not at the corporation's expense.<sup>46</sup> However, in *Peoples* the Supreme Court noted that the Wise brothers did not stand to realize a direct gain at the expense of the corporation in adopting the inventory procurement policy and held that, "it is not required that directors and officers in all cases avoid personal gain as a direct or indirect result of their honest and good faith supervision or management of the corporation."<sup>47</sup> The Court pointed to director's compensation and possibility of the dual position as shareholder and director as examples of situations where directors' interests will "innocently and genuinely coincide with those of the corporation."<sup>48</sup>

The two situations where the Canadian fiduciary duty has received the most judicial attention are in the takeover context and the bankruptcy and reorganization context. These situations are not outliers; rather they represent circumstances where the tension between various stakeholders' individual interests and the interests of the corporation as a whole are the most visible.

With respect to the takeover context, in response to an offer to purchase a controlling interest in a corporation at a premium price, directors of the corporation may take actions<sup>49</sup> to defeat the offer, which normally includes the replacement of directors. Takeovers generally benefit both shareholders who sell and those who retain their shares. Those who sell, enjoy a premium. Those

<sup>47</sup> *Peoples*, *supra* note 1 at para. 39.

<sup>48</sup> *Peoples*, *ibid.* at para. 39.

<sup>49</sup> For example, a poison pill may be put into place. See Jeffrey MacIntosh, "The Poison Pill: A Noxious Nostrum for Canadian Shareholders" (1989) 15 Can. Bus. L.J. 276; see also Peter Dey & Robert Yalden, "Keeping the Playing Field Level: Poison Pills and Directors' Fiduciary Duties in Canadian Take-over Law" (1990) 17 Can. Bus. L.J. 252.

who retain their shares enjoy the improvements that the bidder plans to make. However, takeovers may harm employees, suppliers, the environment, local communities, and others who have made corporation specific investments. For example, the bidder may downsize, move plants, and replace employees. Accordingly, if directors take actions to defeat a takeover they will generally be at the expense of shareholders, and may be to the benefit of other corporate stakeholders. The fact that Canadian courts have generally not intervened when directors have taken such defensive measures, and considered such actions to be a breach of fiduciary duty, runs counter to the shareholder primacy norm and supports the director primacy norm.

In *Teck Corp. v. Millar*,<sup>50</sup> Justice Berger held that directors must be able to act in the best interests of the corporation in responding to a takeover bid and that this extended beyond shareholders' interests:

A classical theory that once was unchallengeable must yield to the facts of modern life. In fact, of course, it has. If today the directors of a company were to consider the interests of its employees no one would argue that in doing so they were not acting *bona fide* in the interests of the company itself. Similarly, if the directors were to consider the consequences to the community of any policy that the company intended to pursue, and were deflected in their commitment to that policy as a result, it could not be said that they had not considered *bona fide* the interests of the shareholders.

I appreciate that it would be a breach of their duty for directors to disregard entirely the interests of a company's shareholders in order to confer a benefit on its employees: *Parke v. Daily News Ltd.*, [1962] Ch. 927. But if they observe a decent respect for other interests

---

<sup>50</sup> (1972), 33 D.R.R. (3d) 288 (B.C.S.C.) [*Teck Corp.*]

lying beyond those of the company's shareholders in the strict sense, that will not, in my view, leave directors open to the charge that they have failed in their fiduciary duty to the company.<sup>51</sup>

In fairness to proponents of the conventional principal agent interpretation of Canadian corporate law, it is important to note that the facts in *Teck* did not involve a conflict between the interests of shareholders and another group of stakeholders. Rather, what was at issue in *Teck*, was the competing interests of two parties attempting to acquire control of Afton Mines Ltd. and Afton's board's conduct in relation to the losing party.<sup>52</sup> Accordingly, Justice Berger's definition of the best interests of the corporation was *obiter* in *Teck*.<sup>53</sup> Further, prior to *Peoples*, Justice Berger's conception of the best interests of the corporation had not been endorsed in any subsequent decisions.<sup>54</sup> Equally notable, is that the *Parke* decision, referred to in *Teck*, concerned a set of facts where employees' interests were in direct competition with shareholders' interests.<sup>55</sup> However, prior to *Peoples*, *Parke* had only been followed in one subsequent Canadian decision and the case involved a co-operative, not a corporation.<sup>56</sup>

Prior to *Peoples* there was a measure of ambiguity on the state of Canadian corporate law on the statutory fiduciary duty. However, the current state of Canadian corporate law on the statutory fiduciary duty is squarely consistent with Team Production Theory. In *Peoples*,<sup>57</sup> the Supreme Court of Canada applied the reasoning developed earlier in the takeover context to the bankruptcy and reorganization context, holding that, "in

<sup>56</sup> *Ibid.*

<sup>57</sup> *Peoples*, *supra* note 1.

determining whether they are acting with a view to the best interests of a corporation it may be legitimate, given all the circumstances of a given case, for the board of directors to consider, *inter alia*, the interests of shareholders, employees, suppliers, creditors, consumers, governments and the environment.”<sup>58</sup> The Supreme Court noted that, “creditors' interests increase in relevancy as a corporation's finances deteriorate ... .”<sup>59</sup> However, the Court also recognized that there are other stakeholders that must be taken into account in an insolvency situation and held that “the Canadian legal landscape with respect to stakeholders is unique. Creditors are only one set of stakeholders ... .”<sup>60</sup> On this basis the Court concluded that because the adoption of the inventory procurement policy did not harm the corporation as a whole, defined more broadly than certain creditors or other stakeholders, the Wise brothers had not breached their fiduciary duty.

Prior to the Supreme Court of Canada's decision in *Peoples*, both the Quebec Superior Court and the Ontario Superior Court of Justice indicated that the law in Canada appeared to be moving toward imposing a fiduciary duty to creditors on directors of a corporation.<sup>61</sup> In the Quebec Superior Court of Justice decision, Justice Greenberg, held that since only creditors have a meaningful stake in the assets of an insolvent corporation, directors have an obligation to ensure that the corporation is properly administered and its assets are not dissipated in a manner that is prejudicial to its creditors.<sup>62</sup> Justice Greenberg adopted Professor Ziegel's view

<sup>61</sup> *People's Department Stores Inc. v. Wise* (1998), 23 C.B.R. (4th) 200 (Qc. S.C.) [*Peoples* 1998]; *Canbook Distribution Corporation v. Borrins*, [2000] 45 O.R. (3d) 565 (S.C.J.).

<sup>62</sup> *Peoples* 1998, *supra* note 61. A number of Canadian academics commented on this decision. See D. Thomson, “Directors, Creditors and Insolvency: A Fiduciary Duty or a Duty not to Oppress?”; Janis P. Sarra & Ronald B. Davis, *Director and Officer Liability in Corporate Insolvency* (Markham, ON:

on extending fiduciary duties to creditors, holding that “It is not [unreasonable], in exchange for the benefit of limited liability, to impose a duty on directors not to sacrifice creditors’ interests when the going gets rough ... . If the company is insolvent ... only the creditors still have a meaningful stake in its assets.”<sup>63</sup> The Supreme Court rejected this line of reasoning and held that the general nature of the statutory fiduciary duty does not change when the corporation approaches insolvency or finds itself in bankruptcy. In doing so, the Court upheld directors legally mandated mediating hierarchy role in the bankruptcy and reorganization context.

The only application of *Peoples* by an appellant court at the time of writing also supports a Team Production Theory explanation of the judicial application of the statutory fiduciary duty in Canadian corporate law. In *Re Stelco Inc.*,<sup>64</sup> as part of Stelco’s reorganization under the *Companies Creditors Arrangements Act*,<sup>65</sup> Justice Farley applied the reasoning in *Peoples* to void the appointment of two Stelco directors, Roland Keiper and Michael Woollcombe, pursuant to s. 111(1) of the CBCA.<sup>66</sup> In reaching his decision,

<sup>64</sup> 2005 CarswellOnt 743 [*Stelco*].

<sup>65</sup> R.S.C. 1985, c. C-36.

<sup>66</sup> Section 111(1) of the CBCA provides that: Despite subsection 114(3), but subject to subsections (3) and (4), a quorum of directors may fill a vacancy among the directors, except a vacancy resulting from an increase in the number or the minimum or maximum number of directors or a failure to elect the number or minimum number of directors provided for in the articles.

Justice Farley characterized Stelco's goal as its successful emergence from CCAA proceedings, as a long-term viable and competitive participant in the domestic and international steel industry, with the maximum benefit for the stakeholders on a collective basis through the facility of a "better corporation."<sup>67</sup> The employee stakeholders of Stelco had brought a motion arguing that, because Mr. Keiper and Mr. Woollcombe were shareholder representatives, as board members they would favour maximizing shareholder value at the expense of the interests of the employees.

Mr. Keiper is the President of Clearwater Capital Management Inc., a Toronto-based investment manager. Prior to co-founding Clearwater in 1999, Mr. Keiper headed the Canadian proprietary investing activities of RBC Dominion Securities. Mr. Woollcombe is a principal of VC & Co. Incorporated, which acts as a strategic advisor to institutional and other shareholders with respect to their investments in Canadian public and private companies. Justice Farley agreed with the employee stakeholders and after 2 days of serving on the board held that Mr. Keiper and Mr. Woollcombe were not in a position to serve as neutral intermediaries as corporate law requires of board members of a public corporation. Justice Farley found that Mr. Keiper and Mr. Woollcombe were "spokespersons for the shareholders"<sup>68</sup> and had as their goals short term maximization of shareholder value. Justice Farley did not feel that the two directors were neutral or that they would "do the right thing in using their business judgment, not the thing which they know or even suspect that any outsider (individual or supposedly important and possibly powerful stakeholder or partial group thereof) may wish to have happen for that outsider's benefit, not the benefit of the new better corporation."<sup>69</sup>

---

<sup>67</sup> *Stelco*, *supra* note 64 at para. 1.

<sup>68</sup> *Ibid.* at para. 20.

<sup>69</sup> *Ibid.* at para. 4.

Justice Farley's decision represents a departure from a Team Production Theory of Canadian corporate law. It runs counter to Canadian courts' historical reluctance to interfere with directors' independence. Justice Farley cites the reasoning in *Peoples* to enable one group of stakeholders, employees, to obviate the independence of the Stelco directors on the basis of a perception that two directors would perform their role with a view to short term shareholder value maximization rather than the best interests of the corporation. Justice Farley's decision challenges Canadian corporate law's understanding of the director as a mediating hierarch based on the reality that directors of public companies in Canada generally have interests that align with a particular group of shareholders or other powerful stakeholders.

On appeal, Justice Blair rejected Justice Farley's attempt to depart from a Team Production Theory understanding of the legal role of directors to consider who was actually playing this role.<sup>70</sup> Justice Blair used the reasoning in *Peoples* to uphold the independent legal role of directors and Canadian courts' reluctance to interfere with that role and propel into the shoes of the board absent clear evidence that the directors were pursuing their interests ahead of the corporation's interests.<sup>71</sup> Justice Blair accepted as a reality that there are connections between Canadian corporate directors and various stakeholders, but held that this in itself was not sufficient to justify a finding of a breach of fiduciary duty and an imposition of a corrective sanction.<sup>72</sup> Accordingly, Justice Blair reinstated Mr. Keiper and Mr. Woollcombe.

#### DUTY OF CARE

In addition to the statutory fiduciary duty, Canadian directors have a legal obligation to "exercise the care, diligence and skill that a reasonably prudent person would exercise in comparable

---

<sup>70</sup> *Stelco Inc., Re*, 2005 CarswellOnt 1188 at para. 70.

<sup>71</sup> *Ibid.* at para. 60.

<sup>72</sup> *Ibid.* at para. 76.

circumstances."<sup>73</sup> On its face, the statutory duty of care appears to be broader than the statutory fiduciary duty. Unlike the statutory fiduciary duty, which stipulates the identity of the beneficiary of that duty as the corporation, the duty of care leaves the beneficiary of the duty open. Accordingly, in *Peoples*, the Court held that such a duty could be owed to creditors. However, in practice, the application of the statutory duty of care has been extremely limited by the business judgment rule.<sup>74</sup> In applying the business judgment rule to the inventory procurement policy that the Wise brothers had adopted and holding that the Wise brothers had not breached their duty of care, the Supreme Court described the Canadian business judgment rule as in line with its commonwealth counterparts:

Canadian courts, like their counterparts in the United States, the United Kingdom, Australia and New Zealand, have tended to take an approach with respect to the enforcement of the duty of care that respects the fact that directors and officers often have business expertise that courts do not. Many decisions made in the course of business, although ultimately unsuccessful, are reasonable and defensible at the time they are made. Business decisions must sometimes be made, with high stakes and under considerable time pressure, in circumstances in which detailed information is not available. It might be tempting for some to see unsuccessful business decisions as unreasonable or imprudent in light of information that becomes available *ex post facto*. Because of this risk of

---

<sup>73</sup> CBCA, *supra* note 27, s. 122(1)(b).

<sup>74</sup> For an alternative view concerning the role of the business judgment rule following *Peoples* see Rousseau, *supra* note 2. Rousseau references the Supreme Court's reliance on article 1457 of the Quebec Civil Code (Q.C.C.) and argues on this basis that the conception of the duty of care in *Peoples* may lead to a greater role for the judiciary in corporate governance and greater liability risk for directors.

hindsight bias, Canadian courts have developed a rule of deference to business decisions called the “business judgment rule”, adopting the American name for the rule.<sup>75</sup>

The use of the business judgment rule to limit the application of the duty of care runs counter to the shareholder primacy model as it insulates directors from claims by corporate stakeholders, including shareholders. The limiting of breach of duty of care actions to those instances where the corporation’s interests as a whole have not been served, supports the mediating hierarch model as it prevents corporate stakeholders from using lawsuits to extract rents from the corporation. Consistent with the theory articulated by Blair and Stout, the limiting role of the business judgment rule in the Canadian context allows directors to sacrifice shareholders’ interests to those of other corporate stakeholders, since it “‘ties the hands’ of shareholders of public corporations in a fashion that ultimately serves their interests as a class, as well as those of other members of the corporate coalition.”<sup>76</sup>

#### THE LIMITS ON SHAREHOLDER VOTING

The third proposition that Blair and Stout put forward to support the idea that the director primacy norm is at work in American corporate law is based on the limits of shareholder voting. The practical and legal obstacles in American corporate law ensure that shareholders cannot use such voting rights to exercise authority over the board of directors. Accordingly, directors can perform their mediating hierarch role free from direct control of shareholders or any other stakeholder of the public corporation. The legal and practical obstacles to shareholder action in the

---

<sup>75</sup> *Peoples*, *supra* note 1 at para. 64.

<sup>76</sup> *TPT*, *supra* note 12 at 305.

Canadian context have been observed by a number of commentators who have argued for greater shareholder voice.<sup>77</sup>

Before outlining the obstacles to shareholder action in the Canadian context, it is important to address the American critique of Blair and Stout's focus on shareholder voting rights. Blair and Stout have been criticized for focusing on shareholder voting rights because they overlook the market for corporate control, which turns "the limited de jure shareholder voice into a powerful de facto form of shareholder control."<sup>78</sup> While observations concerning market based accountability measures are important in evaluating the relative importance of law, they are beyond the scope of the current project of considering the salience of Blair and Stout's description of the *legal* role of directors of Canadian corporations. As part of this evaluation a range of market forces that may cause directors to be accountable to shareholders are not considered – including for example, capital and reputational markets. Where Canadian corporate law does address these forces in the context of the market for control, the earlier discussion on the statutory fiduciary duty indicates that directors' mediating hierarchy role is upheld.

Shareholders of Canadian public corporations have the right to vote to elect or remove directors and also on certain "fundamental" corporate changes.<sup>79</sup> However, the right to vote has significant free rider, collective action, and rational apathy

---

<sup>77</sup> For example, Janis Sarra, "The Corporation as a Symphony: Are Shareholders First Violin or Second Fiddle?" (2003) 36 U.B.C.L. Rev. 403. See also Janis Sarra, "Convergence Versus Divergence, Global Corporate Governance at the Crossroads: Governance Norms, Capital Markets & OECD Principles for Corporate Governance" (2001-2002) 33 Ottawa L. Rev. 177; Edward M. Iacobucci, "The Effects of Disclosure on Executive Compensation" (1998) 48 U.T.L.J. 489; and Anita Indira Anand, "Shareholder Isolation and the Regulation of Auditors" (2004) 54 U.T.L.J. 1.

<sup>78</sup> John C. Coates IV, "Measuring the Domain of the Mediating Hierarchy: How Contestable are U.S. Public Corporations?" (1999) 24 J. Corp. L. 837 at 850-851.

<sup>79</sup> CBCA, *supra* note 27, ss. 140, 146, 173, 176.

problems associated with it. With respect to electing the board, management will generally set the date for elections, nominate candidates, and use corporate funds to solicit proxy votes from shareholders. While shareholders who disagree with management's proposals for a board may obtain a list of shareholders, the shares they hold, and their addresses from the corporation, so as to contact other shareholders for the purpose of influencing their voting, such action is rare.<sup>80</sup> This is in part because, if a shareholder does solicit proxies, other than through a "public broadcast," from more than sixteen shareholders,<sup>81</sup> they must engage in the costly process of sending out a dissident's proxy circular.<sup>82</sup>

Similarly, shareholders right to vote on "fundamental" changes is also limited in reality. The types of changes that are defined as fundamental are narrow. They include amendment of articles;<sup>83</sup> amendment, repeal, or the introduction of new by-laws;<sup>84</sup> amalgamation;<sup>85</sup> and sale of substantially all the corporation's assets.<sup>86</sup> In each case, without a shareholder proposal, all shareholders can do is agree or disagree with the question put to them by the directors.

The exception to the general rule that the board sets the agenda for shareholder meetings, and that the right to vote on fundamental changes is nothing more than a veto power, is the statutory provision for shareholder proposals. Shareholders, who have a right to vote, have held shares for at least six months, and hold either 1 per cent of the total outstanding voting shares of the corporation or shares with a fair market value of \$2000, may make

---

<sup>80</sup> *Ibid.*, s. 21(3), (9).

<sup>81</sup> *Ibid.*, Regulations, s. 67.

<sup>82</sup> *Ibid.*, s. 150(1) (b), Regulations, ss. 61-64.

<sup>83</sup> *Ibid.*, s. 135(6)).

<sup>85</sup> *Ibid.*, s.183(1).

<sup>86</sup> *Ibid.*, ss. 189(3)-(9).

a shareholder proposal for any matter they wish to discuss, including amendments to the corporation's articles.<sup>87</sup> The proposal may include nominations for the election of directors only if holders of not less than 5 per cent of the shares entitled to vote sign the proposal. If the corporation is required to distribute a management proxy circular, the shareholder proposal must be included along with a statement by the shareholder; however, the total word count cannot exceed 500 words.<sup>88</sup> The shareholders' right of initiative with respect to directorial nominations, which does not exist in the American context, is a noteworthy difference in Canadian corporate law. However, this difference does not make it more difficult to argue that Canadian corporate law constitutes directors as independent mediating hierarchs. The shareholder proposal mechanism is not consistently used in Canada. For example, a record number of approximately eighty shareholder proposals were reported in September 2005 for the period between January and September 2005.<sup>89</sup> Out of these proposals, only 3 concerned directorial nominations.<sup>90</sup>

#### **PART IV: TEAM PRODUCTION THEORY AND THE CANADIAN OPPRESSION REMEDY**

Part III illustrated how the features of American corporate law that evidence the director primacy norm and support a Team Production Theory of American corporate law can also be located in Canadian corporate law. These features of Canadian corporate law free directors of widely-held public Canadian corporations to balance the competing interests of the various corporate stakeholders who make up the corporation. However, in order to fully consider whether Canadian corporate law supports a Team

<sup>89</sup> Shareholder Proposals (2005), online at <http://www.share.ca/index.cfm/fuseaction/page.inside/pageID/751215E5-B0D0-157F-F405B9A1ABA8AE7B/index.cfm>.

<sup>90</sup> *Ibid.*

Production Theory, a potential departing point for the Canadian experience, the oppression remedy, which is not found in American corporate law, needs to be examined.<sup>91</sup>

The Canadian oppression remedy has been described as the broadest of the Canadian corporate law remedies.<sup>92</sup> The oppression remedy is available to the same broad range of complainants as the derivative action on proof of an act or omission, in respect of a corporation or its affiliates, that is "oppressive or unfairly prejudicial to or that unfairly disregards the interests of any security holder, creditor, director or officer."<sup>93</sup> The oppression remedy is not only intended to protect strict legal rights, but also to protect the expectations of the complainant.<sup>94</sup> The approach that has most commonly been taken by Canadian courts in interpreting the oppression remedy has been a general fairness

---

<sup>91</sup> In some American states a statutory shareholder oppression remedy exists that is similar to Section 14.30(2)(ii) of the Model Business Corporation Act, which provides for judicial dissolution upon application by a stockholder if "the directors or those in control of the corporation have acted, are acting, or will act in a manner that is illegal, oppressive, or fraudulent." Revised Model Bus. Corp. Act 14.30(2)(ii) (1984). Traditionally on a finding of oppression in states that have adopted this statutory provision, the court could make a dissolution order for the corporation. More recently, the alternative of forcing the purchase of minority shares by majority shareholders has been adopted to prevent "oppression of the majority by the minority." In the limited number of states where the oppression remedy does exist, the remedy is far more limited both in terms of possible complainants and possible remedies on a finding of oppression as compared to the Canadian oppression remedy. See Douglass K. Moll, "Shareholder Oppression in Close Corporations: The Unanswered Question of Perspective" (2000), 53 Vand. L. Rev. 749 and Paula Dalley, "The Misguided Doctrine of Stockholder Fiduciary Duties" (2004) 33 Hofstra L. Rev. 175.

<sup>92</sup> 820099 *Ontario Inc. v. Harold Ballard Ltd.* (1991), 3 B.L.R. (2d) 123 (Ont. Gen. Div.) at 179. For a discussion of the origins of the oppression remedy see *First Edmonton Place Ltd. v. 315888 Alberta Ltd.* (1998), 60 ALR (2d) 122 (QB).

<sup>93</sup> CBCA, *supra* note 27, s. 241(2).

<sup>94</sup> See for example, *Westfair Foods Ltd. v. Watt* (1991), 115 A.R. 34, 79 D.L.R. (4<sup>th</sup>) 48 (Alta. C.A.), leave to appeal to SCC refused 85 D.L.R. (4<sup>th</sup>) viii, recently referred to in *Clarke v. Rossburger* (2001), 18 B.L.R. (3d) 197, 108 A.C.W.S. 74 (C.A.).

standard based on the reasonable expectations of the applicant, rather than three different standards.<sup>95</sup> On a finding of oppression, the court has the discretion to choose from fourteen prescribed forms of relief or to make "the order it thinks fit."<sup>96</sup>

A review of the judicial treatment of the oppression remedy illustrates that it has great potential to deal with extra-legal sources of power that can be used to dictate unfair distributional outcomes that are consistent with strict legal rights of the parties involved, but that do not reflect the parties' reasonable expectations. However, in the current context, the broad characterization of the remedy is most accurate with respect to its availability to minority, and some instances majority shareholders, or other stakeholders of closely-held corporations. The only comprehensive empirical study of the judicial treatment of the oppression remedy in Canada detailed that of the reported oppression remedy decisions between 1995-2001 only 9 per cent or six cases involved widely-held public corporations, with the remaining 92 per cent of oppression actions litigated in the context of closely-held corporations.<sup>97</sup> Of the six cases involving widely-held corporations, only two, or 33 per cent, were successful, compared to a success rate of 54 per cent for closely-held corporations.<sup>98</sup>

In the context of closely-held corporations, the oppression remedy has been used to overcome specific legal rights in cases where the corporation has oppressed the interests and reasonable expectations of the stakeholders seeking relief. Within the context of closely-held corporations, the oppression remedy has

<sup>98</sup> *Ibid.*

not been specifically confined for the benefit of minority shareholders. The oppression remedy was granted to non-minority shareholders of closely-held corporations in 14 per cent of the 80 per cent of cases where the complainants were shareholders of closely-held corporations.<sup>99</sup> For example, in *Gandalman Investments*<sup>100</sup> and *M. v. H.*,<sup>101</sup> both plaintiffs were 50 per cent shareholders. In both cases, the courts expressed the view that determining whether the behavior was oppressive required considering the balance of power, which existed between the shareholders, not solely considering the absolute shareholdings.<sup>102</sup> Canadian courts have also extended the availability of the oppression remedy to a trustee in bankruptcy of a closely-held corporation<sup>103</sup> and granted the remedy to creditors of closely-held corporations in a number of instances.<sup>104</sup>

If the oppression remedy was applied to widely-held public corporations by Canadian courts in the same fashion it has been

<sup>104</sup> See *Sidaplex-Plastics Suppliers Inc. v. Elta Group Inc.* (1998), 162 DLR (4<sup>th</sup>) 367 (Ont. C.A.) and *Downtown Eatery (1983) Ltd. v. Ontario* (2001), 200 DLR (4<sup>th</sup>) 289 (Ont. C.A.).

increasingly applied to closely-held corporations, its existence in Canadian corporate law could cut against a Team Production Theory of Canadian corporate law of widely-held public corporations. That is, the central premise of Team Production Theory is that corporate law is designed to free directors from domination by any stakeholder, which allows them to act as mediating hierarchs. However, if the oppression remedy was widely available and consistently used by stakeholders of widely-held public corporations, then a space for directorial discretion may not exist or be necessary. Corporate law could mandate directors to act on behalf of shareholders, but subject to fair treatment of other stakeholders as protected by the oppression remedy.

*Peoples* leaves open the possibility for the broad use of the oppression remedy by stakeholders of public corporations as it endorses the of-cited description of the oppression remedy as “the broadest, most comprehensive and most open-ended shareholder remedy in the common law world.” Further, the Court held that “the availability of such a broad oppression remedy undermines any perceived need to extend the fiduciary duty imposed on directors by paragraph 122(1)(a) of the CBCA to include creditors.”<sup>105</sup> This reasoning suggests that in future cases the oppression remedy analysis will not require a determination of whether directors have breached their fiduciary duties and that it may be possible to use the oppression remedy to hold directors accountable to individual stakeholders. However, neither position is new, and both can be taken as obiter as the case itself did not concern an oppression action.<sup>106</sup> Importantly, practical obstacles

---

<sup>105</sup> *Peoples*, *supra* note 1 at 48 and 51.

<sup>106</sup> Rather, the case was based on the issue of whether directors owe a duty to creditors. The trustee, representing the interests of the creditors, sued the directors for an alleged breach of the duties imposed by s. 122(1) of the CBCA. In its analysis, the Court recognized that, according to article 300 of the Q.C.C. and s. 8.1 of the *Interpretation Act*, R.S.C. 1985, c. I-21, the civil law serves as a supplementary source of law to federal legislation. The CBCA does not entitle

also stand in the way of the oppression remedy developing in a way that displaces directors existing legal role in Canadian public corporations as mediating hierarchs.

The direction in *Peoples* that the judicial application of the oppression remedy is to be divorced from a fiduciary duty analysis has been given by lower courts in the past without significant impact on how the judiciary has engaged in their analysis of oppression actions.<sup>107</sup> As a practical matter, judges draw on their overall knowledge of corporate law in dealing with the relatively few oppression actions that they are faced with each year.<sup>108</sup> As a result, the judicial treatment of the oppression remedy has frequently drawn from the case law on breach of statutory duties and imported the analysis of concepts such as the “best interests of the corporation” and the “business judgment rule” from this case law.

For example, in *820099 Ontario Inc. v. Harold E. Ballard Ltd.*,<sup>109</sup> Justice Farley granted the oppression remedy to a minority

---

creditors to sue directors directly for breach of their duties, and so the Court deemed it appropriate to have recourse to the Q.C.C. to establish how rights grounded in a federal statute should be considered in Quebec. The Court also looked to the Q.C.C. to determine how s. 122(1) of the CBCA can be harmonized with the principles of civil liability. See *ibid.* at para. 29-30.

<sup>107</sup> See for example *Brant Investments Ltd. et al. v. KeepRite Inc. et al.* (1991), 45 O.A.C. 320; 3 O.R. (3d) 289 (C.A.) affing. (1987), [60 O.R.\(2d\) 737](#) (H.C.), where the Court of Appeal held at 301:

It must be recalled that in dealing with s. 234, the impugned acts, the results of the impugned acts, the protected groups, and the powers of the court to grant remedies are all extremely broad. To import the concept of breach of fiduciary duty into that statutory provision would not only complicate its interpretation and application, but could be inimical to the statutory fiduciary duty imposed upon directors in s. 117(1) (now s. 122(1)) of the CBCA).

<sup>108</sup> See for example, Ben-Ishai & Puri, *supra* note 97 at para. 21, where the authors noted there were 71 cases that dealt with the oppression remedy on its merits between January 1995 and November 2001.

<sup>109</sup> (1991), 3 B.L.R. (2d) 123 (Ont. Gen. Div.) at 171, affirmed (1991), 3 B.L.R. (2d) 113 (Div. Ct.) [*Ballard*].

shareholder of a closely-held corporation. Justice Farely referenced the Supreme Court's definition of a corporation in *Ringuet v. Bergeron*,<sup>110</sup> and held that:

"while it would be appropriate for a director to consider the individual desires of one or more various shareholders ... it would be inappropriate for that director to only consider the interests of certain shareholders and to either ignore the others or worse still act in a way detrimental to their interests. The safe way to avoid this problem is to have directors act in the best interests of the corporation."<sup>111</sup>

The *Ballard* decision has been frequently cited and followed by Canadian courts applying the oppression remedy<sup>112</sup> and was referred to in the *Peoples* discussion of the fiduciary duty,<sup>113</sup> reflecting how difficult it is for the judiciary to divorce their understanding of the Canadian fiduciary duty from their analysis and application of the oppression remedy.

In addition, while Canadian courts have recognized that the oppression remedy is a broad and flexible tool designed to protect the interests of corporate stakeholders in a variety of ways, they have also been influenced by the business judgment rule and its application to the statutory duty of care. For example, in *Re Ferguson and Imax Systems Corp.*,<sup>114</sup> the Court of Appeal for

---

<sup>110</sup> [1960] S.C.R. 672, 24 D.L.R. (2d) 449.

<sup>111</sup> *Ballard*, *supra* note 109 at para. 105.

<sup>112</sup> See for example, *Riverstar Inc. v. Hookenson*, [2004] A.J. No. 1500 (Q.B.); *McAteer v. Devencroft Developments Ltd.*, [2001] A.J. No. 1481 (Q.B.); *Deluce Holdings Inc v. Air Canada*, [1992] O.J. No. 2382 (Gen. Div.).

<sup>113</sup> *Peoples*, *supra* note 1 at para. 41.

<sup>114</sup> (1983), 43 O.R. (2d) 128 (C.A.) at 137. This was an appeal after the application for relief was dismissed under s.234 of the Canada Business Corporations Act. S.C. 1974-5, c. 33. The appellant claimed that the corporation and the directors had, by organizing a special meeting to vote on a resolution to amend its articles to reorganize its capital, acted in a manner that was oppressive, unfairly

Ontario held that it was imperative that the oppression remedy was applied in a manner that balances the protection of stakeholders and the ability of management to conduct business in an efficient manner. More recently, in *Catalyst Fund General Partner Inc. v. Hollinger Inc.*,<sup>115</sup> when Justice Campbell invoked the oppression remedy to remove the directors of Hollinger, he held that this was an extreme form of judicial intervention that should be a measure of last resort where directors were “motivated by putting their interests first, not those of the company.”<sup>116</sup>

A further limitation on the oppression remedy disturbing other aspects of Canadian corporate law that shield directors from domination by individual stakeholders, is that similar to any form of litigation, a significant impediment to recourse through the oppression remedy is the financial resources of the litigants. Recent Canadian case law has held that a class proceeding founded upon an oppression action under the CBCA can be maintained.<sup>117</sup> However, the possibility for oppression remedy class proceedings

---

prejudicial, or unfairly disregarded her interests as a security holder. On appeal, Brooke J.A. found for the appellant and granted her relief for oppression.

<sup>115</sup> 2004 CarswellOnt 4772 (S.C.J.). This was an application by Catalyst against Hollinger Inc., where it sought the removal of a majority of the company's board of directors pursuant to the power granted under the oppression remedy. The allegations against those directors concerned the fact that \$1.1 million loan made by Hollinger Inc. to its parent Ravelston had not been authorized by the Board of Hollinger Inc. at the time it was made in June 2004. Further, the existence of the loan had not been disclosed during Catalyst's first application heard earlier by the court.

<sup>116</sup> *Ibid.* at para. 83.

<sup>117</sup> *Stern v. Imasco*, [1999] 1 B.L.R. (3d) 198 at para. 78 [*Stern*]. In *Stern*, Daniel Stern initiated an action, on behalf of himself and as representative of a class that included all shareholders (other than the defendants), claiming that a proposed transaction was oppressive and that it constituted a breach of fiduciary duties owed by the individual defendant directors to Imasco's shareholders. Although the Court dismissed the motion, Justice Cumming found that Stern's claim for oppression was a complaint only against the corporation rather than the directors, and that an oppression action could form a basis for a class proceeding, despite the fact that there are many elements of a class proceeding that are not found in an action for oppression.

is limited by the requirement that all members of the class must demonstrate that they have common reasonable expectations.<sup>118</sup>

## PART IV: CONCLUSION

This article has used the recent Supreme Court of Canada decision, *Peoples*, which has attracted a great deal of interest among academic and lawyer commentators, to challenge the underlying assumption that Canadian corporate governance debates are currently operating on. That is, Canadian corporate law of public corporations currently reflects a principle-agent, shareholder primacy model and *Peoples* represents a departure from this model. This article has challenged this understanding of Canadian corporate law by illustrating how key features of Canadian corporate law, including *Peoples*, are consistent with a director primacy norm and the Team Production Theory of corporate law developed in the American context.

By illustrating that the current state of Canadian corporate law frees directors of widely-held public companies to balance the competing interests and maintain the confidence of the various stakeholders of such corporations, this article has provided the descriptive context for beginning to ask a range of normative questions. In particular, is the legal role of directors of Canadian

---

<sup>118</sup> *Shaw v. BCE Inc.*, [2003] O.J. NO. 2695 (QL) (S.C.J.) [*Shaw*]. In *Shaw*, BCE filed a motion that the Statement of Claim be struck out and dismissed against BCE on the ground that it disclosed no reasonable cause of action against BCE. In the Statement of Claim, Shaw pled two causes of action: negligent misrepresentation and oppression. Justice Farley found that Shaw did not make out a reasonable cause of action for oppression, further stating that Shaw was not an appropriate representative plaintiff since his personal "wish list" of expectations were not reasonable and were not shared by all of the shareholders. It should be noted that Shaw amended the Statement of Claim, and BCE again filed a motion to strike on the same grounds. In *Shaw v. BCE Inc.*, [2003] O.J. No. 5481 (QL) (S.C.J.), affirmed [2004] O.J. No. 3109 (QL) (C.A.), Justice Farley again struck the amended Statement of Claim as failing to disclose a reasonable cause of action in oppression.

corporations consistent with the role that they actually play? In addition, is it possible and/or desirable for directors of Canadian corporations to play this role given the current composition of corporate boards? Further empirical work needs to be done to consider the first question and the issue of the relative importance of law in this context.

The second question concerns a central fairness issue that arises from a Team Production Theory of Canadian corporate law. That is, while directors are constituted as independent mediating hierarchs in law, they are overwhelmingly drawn from the ranks of powerful corporate stakeholders, including shareholders and creditors. Blair and Stout suggest that like the judiciary or the police, it is possible for directors to play an independent role, even if they are drawn from a certain group of stakeholders.<sup>119</sup> As recognized by Justice Farley in *Re Stelco*, the role of the corporate director as currently conceived in practice is quite different than that of a professional acting in the public interest. As currently constituted, a directorship is a business role. Directors will have a range of extra-legal incentives to favor powerful stakeholder interests over those of more politically vulnerable stakeholders, such as employees, in a range of situations. For example, Millon has argued that in a widely-held public corporation, shareholders will always have a lower cost exit option than employees who have already made team specific investments in nontransferable knowledge and skills.<sup>120</sup> These unequal power relations within public corporations translate into employees extracting minimal surpluses, despite increased productivity demonstrated by indexes, such as the Dow Jones Industrial Index, increasing rapidly in value.<sup>121</sup> On this basis, Millon argues that shareholders will always win the rent allocation contest.<sup>122</sup>

---

<sup>119</sup> TPT, *supra* note 12 at 253.

<sup>120</sup> Millon, *supra* note 26, at 1042.

<sup>121</sup> *Ibid.* at 1029.

<sup>122</sup> *Ibid.*

In considering whether the independent hierarchy legal role for directors is the most desirable model, a question that will need to be considered in the Canadian context is if and how this role can be given meaning in practice. One possibility is to create a class of professional independent mediating hierarchs or to “professionalize” directors through education. Director education has already been recognized as a mechanism for dealing with the increasingly complex nature of the Canadian business climate as well as the dynamic role that directors are expected to play in this climate.<sup>123</sup> Both commentators and members of the legal community have acknowledged a link between board competence and corporate success.<sup>124</sup> Even directors themselves have realized that limitations on their ability to participate in meaningful and strategic discussions are due to gaps in their knowledge and understanding about both the role of the board, as well as the corporation for which they serve.<sup>125</sup>

At the same time, there are number of challenges that will need to be addressed in adopting this approach. Successful educational programs may be restricted by the limited term of directorships, typically to a maximum of three years.<sup>126</sup> To address this concern, any director training must be concise and time-sensitive, and also broad enough in scope to allow transferability between boards. Director education might also contribute to complacency about board effectiveness by giving a false sense of security about the

competence of individual directors.<sup>127</sup> As well, if director training becomes a prerequisite, this could stifle board diversification by limiting qualified candidates,<sup>128</sup> and thereby limit board effectiveness based on the rationale that the more diverse the board is, the more capable it will be to play an independent mediating hierarch role.<sup>129</sup> Finally, the risk of high costs associated with director education could further limit access to such education and reduce diversity of corporate boards.
